Electrical Electronic Engineering Lecturer (Distance Learning)

Description Part-Time Flexible Working

Course Development / Tutor Role for Online Engineering College Immediate Start for the right candidate.

Flexible Hours Remote Working

My Client is an online engineering college with online engineering courses at level 4, 5 and 6.

They deliver their course material in a manner to allow the students to work in their own time and pace, via bite-size learning steps utilising a combination of reading, videos and worked examples.

About the Job

This is for a fixed term contract for the production of distance learning material for **Electrical and Electronic Engineering** related content.

However, the selected candidate may also be offered an on-going part-time contract for the support and assessment of learner work.

This is a unique opportunity to work with a new and dynamic distance learning company, and represents an opportunity to grow in to an expanding role over time.

About the Right Candidate

You must have:

- experience teaching **Electrical and Electronic Engineering** either at at college or university level within the UK education system
- an Electrical and/or Electronic Engineering Engineering degree or above

Responsibilities

In the first instance, this will be a fixed short-term contract for the creation of learning material suitable for distance learning in **Electrical and Electronic Engineering**. However, my client are keen to find a suitable person to provide ongoing support to learners and marking of assignments etc and so further opportunities are possible for the right candidate.

Qualifications

Bachelors degree in Electrical and Electronic Engineering required as a minimum qualification.

Higher Degree desirable.
